

The EMX-2 is shown here with a PX Cutter mounted behind the needle

Reduce narrow fabric waste with the EMX-2

- Coordinates the operation of other attachments with your metering device using the same easy-to-program control box

Includes: EMX control box, synchronizer, photo eye assembly, metering mechanism with a 60 ounce-inch motor and rollers (1 1/2" or 3" standard), mounting hardware and power cord

Use the EMX-2 with two outputs to actuate a cutter and control the sewing machine motor (right) for 'cut-and-stop' savings of narrow fabric
