

**Model: HC-530 CD**

**Hot & Cold Automatic Strip Cutting Machine**

The HC-530CD was developed specifically for government contractors doing name tags. It replaces an operation currently done by hand. With the highest quality sensors our machines are able to determine different color shades, this feature allows you to cut the webbing 3 to 4 inches before the first letter of a name and 3 to 4 inches after the last letter. The sensitivity of the sensors is adjustable to any color or contrast. Machine available with hot/cold blades.
