

## U.S. MODEL 1099-PWB

## TROUSERS/CUFF FELLING

Designed to overcome the problem of knits, worsteds and a vast variety of man-made fibers which are difficult to blind stitch. Fells with an overcast stitch that prevents raveling, tucks all loose threads under fells at the same time. Recommended for cuffless trousers.

**U.S. MODEL 1099-PWB** Designed for medium to heavy weight trousers particularly where seams are heavy. Features yielding rib. Single turn cuffs.

**U.S. MODEL 1099-PWB-1** For bulky safety stitch seams, lap seams, overlock, single turn, difficult turned under type cuffs and heavy work material. Recommended for denim.

**U.S. MODEL 1099-PB-1** The most successful cuff felling machine for men's trousers, both cuffs and cuffless. Ideal for knits and woven materials. Gives a hand tailored appearance.

**U.S. MODEL 1099-PBT** Dual purpose for formalwear alterations on trouser cuffs and the new telescopic sleeve felling application. Increases the life of rental garments.

Also available 1099-PB for Raw Edge Trouser Fellings.
