

Features

- ▶ Special sewing equipment with floating presser for smooth seams and exact application of fullness
- ▶ Edge guide with automatic seam width adjustment when changing from side to shoulder seams
- ▶ Semi-automatic operating cycles (adjustment of the edge guide, seam end using sensor, mirror-image seams), without complicated seam programming
- ▶ Absolutely identical shoulder seams, due to automatic mirror image seams
- ▶ If required – e. g. for improved utilization – for all types of assembly seams

Specifications

- ▶ Max. sewing speed: 4,600 s.p.m.
- ▶ Max. stitch length: 4.5 mm
- ▶ Output in 8h:
300 to 350 side- and shoulder seams
