

Features

- ▶ The all-purpose machine with a wide area of applications for even and pucker-free seams
- ▶ The puller can be raised, stopped and swung out of the work area manually
- ▶ The electronically-controlled puller feed motion, in conjunction with a pre-selectable roller pressure, guarantees smooth seams
- ▶ Very quiet, vibration free operation
- ▶ Puller unit can be shifted to the side of the needle
- ▶ Puller roller steel: width 10.0 mm (standard)
- ▶ Puller roller plastics in different widths: 10.0 mm, 15.0 mm, 20.0 mm and 30.0 mm
- ▶ Very quiet, vibration free operation
- ▶ Metering of hook and needle-bar lubrication
- ▶ Microfine to medium parts sets for best feed properties

Specifications

- ▶ Max. speed: 5,000 s.p.m.
- ▶ Max. stitch length: 4.5 mm
