

Features

- ▶ Traditional taping combined with the possibility of direct welding
- ▶ Easy operation by user-friendly touch screen
- ▶ Monitoring of heat temperature by two thermocouples (optional)
- ▶ Single segments and complete processes are programmable
- ▶ Automatic monitoring and constant of all programmed parameters
- ▶ Variable post system (post width and post position for different applications)
- ▶ Exact reproducible nozzle-settings possible through cross-slide
- ▶ Programs and parameters can be transferred to other machines which run in production process
- ▶ Nozzle position is maintained to material for cross-stitching (seam bulge)
- ▶ Tape cutter

Specifications

- ▶ Max. speed: 0.5 to 10.0 m/min.
- ▶ Optional up to: 20 m/min.
