

BC-700/BC-900

DESCRIPTION

BANDKNIFE CUTTING MACHINE

LOW VIBRATION AND NOISE

The precise professional design has low vibration and noise. The chassis structure imitates the heavy crane design idea-widen the vertical base and move down the gravity to make the machine more stable

CONVERTER, MADE IN JAPAN

The converter, made in Japan, has low maintenance. If the voltage is overloaded, the self-detection circuit of converter will display error message. The external electric control box is easy to maintain.

HIDDEN KNIFE BELT TENSION

The latest hidden knife belt tension control can keep the blade in proper tension. The hidden labor-saving bar makes the knife belt replacement easily and quickly, and the knife belt fixed magnet ensures the safety when the operator replaces the knife belt.

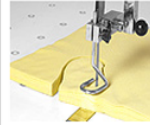

KNIFE BELT AND SHARPENING

The oil felt for cooling knife belt (Enable to add silicon oil) can prevent knife from sticking when trimming special fabric. The knife sharpening area has acrylic outer cover which can protect eyes from the flying dust when sharpen the knife.

KNIFE BELT SAFETY DEVICE

While using the machine, the knife belt safety device is flexible with adjusting height, which can protect operator from accidental injury due to incautious touch.

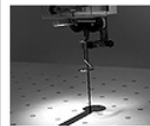

HUMANIZED BALL FLOATING

The humanized ball floating table-blowing in trimming area, stop blowing in non-using area-which is easy to operate and saving time. The ball floating design can prevent foreign material blowing into the eyes when start the floatation.

INDICATION LIGHT AND LED LIGHTING

When BAND KNIFE machine starts, the operation indication light can remind the operator that the machine is running, be careful to operate. LED lighting equipment enables the operator to know the trimming part clearly and relieve eyestrain.

STREAMLINE DESIGN

The streamline form is the focus of all equipment and also the one you can not miss. The table height can be adjusted and moved freely to adapt to different operator's height. 100% made in Taiwan.

MODEL	BC-700	BC-900
Arm Size/mm	700	900
Table Size/mm	1800x500	2100x1500
Table Height (adjustable)/mm	850-950	
Max. Cutting Thickness/mm	180	
Min. Width of the Knife/mm	2.5	
Available Height	8"	
Speed Control (Variable)	0-1060 m/min (0-60hz)	
Available Fabric	General Knitted, Woven Fabrics	
The applicable	Rigid Jean below/Rigid rubberized non-woven fabric below 2".	

restriction of the special Fabrics	Rigid Plastic leather below / Rigid PVC leather below / Rigid synthetic leather below 1".
