

FBX series is a cylinderbed, 2~12 needle double chainstitch machine with needle feed.

It is designed for sewing waistbands of medium heavy to heavy material such as jeans and working pants.

As needle feed and lower feed are linked, both feeding amounts can be adjusted at the same time by push-button operation. An additional rear puller is available as option. The needle feed solves any problems, such as twisting, puckering and slipping of the material.

FBX series has a wide range of applications as it can sew material up to a width of 70 mm, especially tubular goods such as waistbands, elastic attaching, sewing shirts fronts and more.

Option PA-1: Auto Skip-Stitch device
