

Highlead GG0068-1
High Speed Lockstitch Industrial Zigzag Sewing Machine
With standard & 3 step Zigzag stitching

The Highlead GG0068-1 is a high speed zigzag machine for industrial production use which features a newly designed stitch pattern change over device.

The stitch pattern change over device allows the operator to easily switch between standard zigzag stitching and 3-step zigzag stitching. In the past you would have had to purchase 2 separate machines (or manually change cams) to get both of these stitch patterns. Now operators can select: standard zigzag or 3 step zigzag by using a change over lever which is fitted with-in the sewing machine arm.

This high speed machine features an automatic lubrication system which ensures the durability required for industrial use.

When sewing with the standard zigzag pattern: a stitch width of up-to 5mm is available. This increases up-to 10mm when sewing with the 3 step zigzag pattern.

Change over lever fitted with-in machine arm

Available for use in many different sections of the clothing & textile industry including: underwear, bra, swim wear, towels etc.

Features:

- High speed lockstitch zigzag
- Standard & 3 step changeover lever
- Large hook
- **Up-to 10mm Zigzag width (3 step)**
- **Up-to 5mm Zigzag width (standard)**
- Reverse stitch lever
- Stitch Condenser (dial adjustable)
