

Highlead GK0088

SINGLE NEEDLE PIN POINT SADDLE STITCH CHAINSTITCH SEWING MACHINE

The Highlead GK0088 is an industrial sewing machine made to reproduce the Pin-Point saddle stitch special decorative stitch formation.

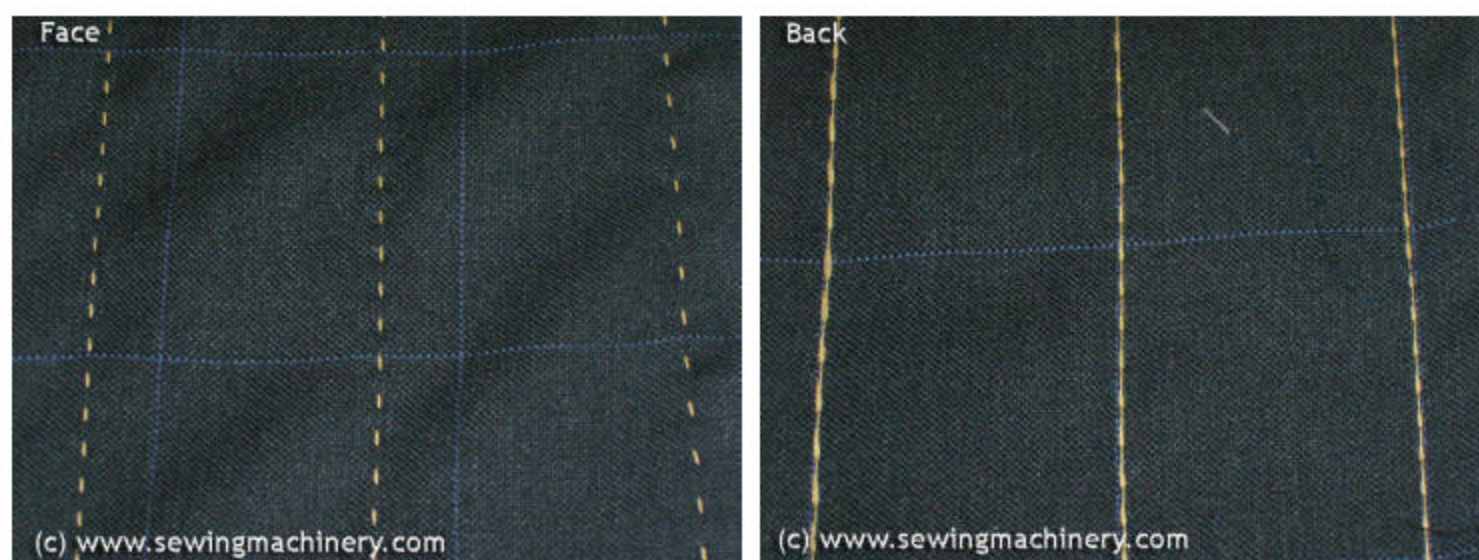

The machine is used to add pin point saddle stitching onto the outside face of men's & woman's suits etc.

This model is versatile and with its up-to date design; the machine can also be used to add pin point saddle stitch decorative stitching to shirt/blouse collars, sides of trousers, pocket fronts, coats collars and other garments etc.

To produce a Pin point stitch the machine uses a specially designed feeder mechanism combined with a top sewing needle and hook needle.

The machine is fitted with a stitch length adjusting dial which adjusts the back-side stitch length; allowing for different stitch spacing on the front face of the garment. (see photo below)

The machine is operated like a standard flat machine and comes complete on unit stand with clutch motor or optional electronic needle position motor.

Stitch sample, note the difference in the stitch spacing on each of the 3 sewn lines
