## DESCRIPTION

**MULTI-FUNCTION COMPUTERIZED AUTOMATIC ELASTIC ATTACHING**

For attaching elastic on small openings of swimsuit, leotards or brief etc. 26 sets of sewing project programmed in computer, each project has 26 sections of tension and length control. Therefore, increasing production efficiency.

Function :
1. LCD panel display.
2. 26 sets of sewing project computerized memory, each project has 26 sections of tension and length control.
3. Manual/automatic/feeding test/tape cutting are available and each process shown on LCD panel.
4. Elastic tape Feeding can be adjusted to be normal or high speed.
5. Feeding motor can be stopped and then be regarded as regular sewing.
6. If operation failed, automatically return to the first section of sewing project.
7. Adjustable functions of starting feeding, postpone feeding, beginning and ending suction, stretching elastic etc.
8. Beginning feeding can be added a function of stretching elastic tape.
9. Active feeding to prevent inefficient tape feeding.

Remark :
1. This machine is equipped with following devices:
   VT : Vertical type pneumatic chain cutter
   LF-A : Electric tape feeding device
   TU : Venturi Device.
   **With short roller for elastic width under of 16mm (LF-D3)
2. Option Long roller for elastic width of 16mm~50mm (LF-D3A)
