

# MG-2DNR-1 MICRO | Decorative MicroPurl Edging Machine

## Description

The Merrow MG-2DNR-1 MICRO sews the only stitch of its kind in the world - a 1/32" "MicroPurl" for decorating the edges of sheer and gossamer fabric. No other sewing machine can match the precision of the purl sewn by the MG-2DNR-1 MICRO.

## MG-2DNR-1 MICRO Applications

DECORATIVE MICROPURL® FOR GOSSAMER PANTIES

DECORATIVE MICROPURL FOR CHIFFON SCARVES

## The Advantage of the MG-2DNR-1 MICRO

The MG-2DNR-1 MICRO applies a distinctive and unique decorative "MicroPurl" to product edges. The MicroPurl rolls fabric within a 1/32" edge on sheer and gossamer fabric, creating a complimentary accent to fine lingerie and other garments.

### WHY it's better

No other sewing machine can match the precision of the purl sewn by the MG-2DNR-1 MICRO - it is without exception the smallest, tightest decorative edge available, and the perfect accent to delicate lingerie and other plush garments.

### HOW it's better

Using rubber feed dogs and a specially weighted presser foot, the MG-2DNR-1 MICRO resides squarely at the intersection of art and engineering; it pairs Merrow's cam-driven architecture with a special rolling apparatus to produce the most delicate stitch on the finest material.

### WHERE it's used

The MG-2DNR-1 MICRO is used by fashion designers and clothing manufacturers looking to put a unique accent on fine or delicate garments.
