

MG-3U NARROW | NARROW EDGE EMBLEMING MACHINE

Description

The Merrow MG-3U NARROW sews a tight narrow stitch on emblem edges. The MG-3U NARROW was designed for use with smaller patches and badges that require less accent at the edge.

STITCH RANGE	20 - 40 SPI
STANDARD NEEDLE	MERROW 4SDT
MERROW NEEDLE RANGE	MERROW 3SDT-5SDT
FEDERAL STITCH TYPE	505
MOTOR REQUIRED*	Merrow M12, 1/2HP, 3450 RPM
NUMBER OF THREADS	2

MG-3U NARROW Applications

The Advantage of the MG-3U NARROW

The Merrow MG-3U NARROW is a 2-THREAD industrial sewing machine that is meant for putting a narrow edge on smaller emblems and patches. It makes a 1/16" to 3/32" stitch at a standard rate of 28 SPI (though this can be decreased or increased to 20 or 40 SPI respectively), yet even while running at 5500 RPM still operates under 90 dbA. The MG-3U NARROW carries a 10 year warranty, though it is expected to run for years after that with routine care.

WHY it's better

The Merrow Narrow Edge is the standard bearer for emblem edging on smaller patches, badges, and insignias. Noticeable for its finish and regularity, the Merrow NARROW Emblem Edge is a distinctive mark of quality that can only be made by the Merrow MG-3U NARROW.

HOW it's better

The MG-3U NARROW is fitted with a specialized needle plate with a smaller stitch tongue that allows the formation of a narrow, tight, full stitch. It sews with only two threads to reduce tension on the emblem edge, yet maintains the same coverage and uniformity characteristic of a merrowed edge.

WHERE it's used

The MG-3U NARROW is a versatile industrial machine that will satisfy the needs of the local emblem shop to the factory producing thousands of patches per day.
