Workstation for Elasticating Pre-Closed Waist of Panty

Yamato *Made in Japan*

VG2751-132S5-8F/MA1/Y

Workstation for Elasticating Pre-closed Waist of Panty

*Just concentrate on handling.
The rest is done by machine, including material saving!*

- **Labor-Saving!**
 - 1 Drawing one set, tension to elastic tape
 - 2 Control fabric tension for overlap
 - 3 Cutting tape, while sewing excess
 - 4 Sewing tape for next piece
 - 5 Pressed trimming
- **Material Saving!**
 - 1 Elastic tape from other roll or box
 - 2 Machine stop after overlap
- **Easy Maintenance!**
 - 1 Less adjustment fully automated
 - 2 Mechanical, simple designed mechanical & electrical components, therefore decrease adjustment and maintenance.

Specifications

1	4	32	1/2"	100	1000
2	4	32	1/2"	100	1000

Max. Tape width: 28 mm

This 2-Needle 4 Thread Interlocker for Elastic Tape attaching on Ladies panty is giving pre-set tension to elastic tape, feeding from roll or box. The fabric is trimmed for overlap, tape is cut and inserted automatically for next piece. Machine stop after overlap.

Operator is just required to load, handle and unload the article. Yamato's unique "Pull, Cut & Re-entry" system saves approx.50% of waste of tape, compared to usual flatbed elasticator.

Simply designed mechanical & electrical components minimizes downtime in adjustment and maintenance.

With thread trimmer and Yamato Direct Drive Servo Motor.
